PROJECTS

ShoeKart 📄 | A shoes e-commerce platform

React.js, Node.js, Express.js, MongoDB

Led end-to-end design and development of a responsive user-centric e-commerce platform that provides a seamless shopping experience with intuitive features and an administrative section with robust functionalities for efficient backend management.

CertiSure 📄 | A certification generation platform

React.js, Tailwind CSS, Flask, MongoDB

Led the successful development of a platform that enables personalized certificate generation with QR code embedding and server-side validation. Optimized the interface to provide users with an intuitive dashboard, robust editor, template engine, and streamlined bulk importing processing, enhancing usability and functionality.

Medicure 📄 | An appointment management application

React Native, Flask, OpenAI, MongoDB

Designed and developed a comprehensive solution to bridge the gap between healthcare providers and patients, offering a user-friendly platform for seamless appointment scheduling and efficient management of medical records. It uses generative AI to dynamically allocate appointment slots based on real-time data and implement EHR, optimizing the scheduling process.

HireHub 📄 | A job hiring portal

HTML, CSS, JavaScript, Flask, MySQL

Built an all-in-one platform for job seekers and providers, featuring robust functionalities such as user authentication and roles, advanced job search capabilities, digital resume creation, job fit score, etc.
